Objective

A skilled Frontend Developer looking to utilize broad knowledge of programming and development using various programming languages and related tools and frameworks to solve clients' business problems.

Profile Summary:

Working as a Developer, for Apidrome Pty Ltd, Australia, with my background in Master of Computer Applications, MCA, I'm eager to contribute and learn new/existing technologies and methodologies in any project or support or implementation activities and wish to bring the best outcome in any pressure situation.

Technologies:

Programming/Scripting/Web Technologies: HTML5, CSS, JavaScript,
React, React Native.
OS: Windows, macOS
Others: Git, GitHub.

Projects & Experience:

Apidrome Pty Ltd (2018 to till date)

Web and Mobile App development:

- Undertaken complex analysis of systems, including diagnosis and correction of faults and proposed solution.
- Developing dynamic and interactive responsive website.
- Responsible for developing mainly user interfaces.
- Monitoring Application performance.
- Modern front-end and development tools such as, Babel, web pack, npm, etc.
- Experience with source code management workflows across multiple teams with Git.
- Experience in consuming Web Services – REST/JSON.
- **Firebase/Fire store cloud functions**

Project: Covid-19 Tracker App

Description:

- Developed a Covid-19 Tracker app in React using react hooks, Material UI, Chart js, APIs,

Project URL: <https://reactapp-covid19.netlify.app/>

Project: Accounting Firm Website

Description:

- Developed an Accounting Firm Website in React js using Material UI, Styled Components, React hooks, react-router

Project URL: <https://accountingfirm.netlify.app/>

Project: GitHub Users App (Individual)

Description:

- Developed a GitHub Users app in React using react hooks, Material ui,

Project URL: <https://recatapp-githubusers.netlify.app/>

Project: Todo App (Individual)

Description:

- Developed a Todo app, which tracks the number of total Todos as well as the number of unchecked TODOs

Project URL: <https://www.youtube.com/watch?v=vUR2bxkU2A0>

Project: Pomodoro Timer (Individual)

Description:

- Developed timer using React Native to break down work in to intervals with 25 minutes in length with short breaks.

Project URL: <https://www.youtube.com/watch?v=bSjwsKWjDkU>

Project: Movie App development (Individual)

- React Native app that interacts with the TMDb API showing the information about movies.
- Developed workflow for mobile apps.
- Used live APIs for fetching data.
- Used external libraries for additional functionality.
- Created a multi-page application.

Project URL: <https://www.youtube.com/watch?v=MjojXAgYSOs>

Project: News App development (Individual)

- React Native app using JavaScript, React Native.
- Redux for managing the app's state.
- Used Axios, a promised-based HTTP client to make API calls.
- Used Redux Thunk, middleware to write action creators.
- Used external libraries for additional functionality.
- Created a multi-page application.

Project URL: https://www.youtube.com/watch?v=BbWc_CMoZoA

Academic Projects:

Remote System control and monitoring in VC++

Description:

- We control and monitor the nearby systems by installing the program to the computers connected in LAN.

My Role:

- Analyze the information required.
- Document the functionality requirements.
- Ability to track and control assets remotely.
- Developing, integrating, testing and debugging the application.

Inventory system in VB and ASP.Net

Description:

- Tracking the inventory levels, orders, sales and deliveries.
- Control the amount of capital invested in products during the sales.
- Calculating the inventory on hand, stock in transit and any outstanding orders.

My Role:

- Developing, integrating, testing and debugging the application.
- Creating a work order, bill of materials and other production

related documents.

- Analyzing user information needs.
- Document the functionality and requirements.
- Maintains computer systems and programming guidelines by writing and updating policies and procedures.

Both academic projects were designed and developed with a team of 3 members. With my initiative and being a good problem solver completed the projects without delay.

Academic Qualification:

- Master of Computer Applications, First Class Distinction, India
- Bachelor of Applied Science, First Class in Information Technology, India

Truly,

Sakhiyakauser Shalikbasha
